14 CFR Part 71

[Airspace Docket No. 99–AGL–44]

Establishment of Class E Airspace; Batesville, IN

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action establishes Class E airspace at Batesville, IN. A Transponder Landing System (TLS) Standard Instrument Approach Procedure (SIAP) to Runway (Rwy) 36 has been developed for Hillenbrand Industries Airport. Controlled airspace extending upward from 100 to 1200 feet above ground level (AGL) is needed to contain aircraft executing the approach. This action creates controlled airspace for this airport.

EFFECTIVE DATE: 0901 UTC, February 24, 2000.

FOR FURTHER INFORMATION CONTACT: Denis C. Burke, Air Traffic Division, Airspace Branch, AGL–520, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, Illinois 60018, Telephone (847) 294–7568.

SUPPLEMENTARY INFORMATION:

History

On Friday, August 27, 1999, the FAA proposed to amend 14 CFR part 71 to establish Class E airspace at Batesville, IN (64 FR 46870). The proposal was to add controlled airspace extending upward from 700 to 1200 feet AGL to contain Instrument Flight Rules (IFR) operations in controlled airspace during portions of the terminal operation and while transiting between the enroute and terminal environments. Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received. Class E airspace designations for airspace areas extending upward from 700 feet or more above the surface of the earth are published in paragraph 6005 of FAA Order 7400.9G dated September 1, 1999, and effective September 16, 1999, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document will be published subsequently in the Order.

The Rule

This amendment to 14 CFR part 71 establishes Class E airspace at Batesville, IN, to accommodate aircraft executing the proposed TLS Rwy 36 SIAP Hillenbrand Industries Airport by creating controlled airspace. The area will be depicted on appropriate aeronautical charts.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this regulation—(1)

is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 CFR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is routine matter that will only affect six traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.
